Retirement Plan for Employees of the
Town of Surfside
9293 Harding Avenue
Surfside, Florida 33154

**Re: Retirement Plan for Employees of the Town of Surfside
GASB Statement No. 67 Year End (True-Up)**

Dear Mayte:

As requested, we are pleased to enclose a copy of the Year-End Disclosure Report of actuarial information as of September 30, 2022 for the Retirement Plan for Employees of the Town of Surfside (Plan) required under GASB Statement No. 67.

We are pleased to enclose the following exhibits:

- Statement of Change in Net Pension Liability and Ratios
- Schedule of Contributions
- Notes to Schedule of Contributions
- Discount Rate
- Sensitivity Analysis

For GASB Statement No. 67, the actuarial valuation of the liabilities is determined as of the beginning of the year, October 1, 2021, and *rolled forward* to the measurement date, September 30, 2022. As you are aware, using the beginning year valuation liabilities allows for timelier reporting at year end. If significant changes occur during the year, such as benefit changes or changes in assumptions or methods, these may need to be reflected in the process.

The enclosed exhibits were based upon draft financial information as of September 30, 2022, which was furnished by the Town. **If this draft financial information changes during the auditing process, these exhibits may require revision.**

Please note there are other items not listed above that will be required in the Plan's financial statements and / or the Town's Comprehensive Annual Financial Report (Annual Report) to fully comply with GASB Statement No. 67 standards. This additional information will need to be provided by the Plan's investment consultants, accountants or other financial statement preparers.

Required Disclosures

Plan provisions, member census data and actuarial assumptions and methods employed for purposes of our calculations are the same Plan provisions, member census data and actuarial assumptions and methods utilized for the October 1, 2021 Actuarial Valuation.

The actuarial assumptions used in this Actuarial Valuation are as adopted by the Board of Trustees. The economic and demographic actuarial assumptions are based on the results of actuarial Experience Studies for the periods October 1, 2009 - September 30, 2014. The mortality assumptions are as prescribed by statute. Each assumption represents an estimate of future Plan experience.

Financial data was provided by the Town for the October 1, 2022 Actuarial Valuation. DROP account balances total \$508,388 as of September 30, 2022.

The GASB Net Pension Liability and Plan Fiduciary Net Position as a Percentage of Total Pension Liability may not be appropriate for assessing the sufficiency of Plan assets to meet the estimated cost of settling benefit obligations but may be appropriate for assessing the need for or the amount of future contributions.

Future actuarial measurements may differ significantly from the current measurements presented in this report due to such factors as the following: Plan experience differing from anticipated under the economic or demographic assumptions; changes in economic or demographic assumptions; increases or decreases expected as part of the natural operation of the methodology used for these measurements (such as the end of an amortization period); and changes in Plan provisions or applicable law. Due to the limited scope of the actuary's assignment, the actuary did not perform an analysis of the potential range of such future measurements.

This report should not be relied on for any purpose other than the purpose described in the primary communication. Determinations of the financial results associated with the benefits described in this report in a manner other than the intended purpose may produce significantly different results.

This report was prepared using our proprietary valuation model and related software which in our professional judgment has the capability to provide results that are consistent with the purposes of the valuation and has no material limitations or known weaknesses. We performed tests to ensure that the model reasonably represents that which is intended to be modeled.

This report has been prepared by actuaries who have substantial experience valuing public employee retirement plans. To the best of our knowledge the information contained in this report is accurate and fairly presents the actuarial position of the Plan as of the valuation date. All

¹ Projected prior to fiscal year ended September 30, 2014

² Reported payroll on which contributions to the Plan are based as provided under GASB No. 82

III. Notes to Schedule of Contributions

Valuation Date: Actuarially determined contributions are calculated as of October 1st - two years prior the fiscal year end in which contributions are reported.

Methods and Assumptions Used to Determine Contribution Rates for Fiscal Year Ended September 30, 2022:

Actuarial Cost Method	Entry Age
Amortization Method	Level dollar amount, Closed
Amortization Period	30 years
Asset Valuation Method	5-year smoothed market
Inflation	2.5%
Salary Increases	4.0% - 8.0%
Investment Rate of Return	7.25%
Retirement Age	Experience-based table of rates that are specific to the type of eligibility condition
Mortality	<p>For healthy participants during employment, PUB-2010 Headcount Weighted Safety Employee Female Mortality Table and Safety Below Median Employee Male Mortality Table, both set forward 1 year, with fully generational mortality improvements projected to each future decrement date with Scale MP-2018. For healthy participants post employment, PUB-2010 Headcount Weighted Safety Healthy Retiree Female Mortality Table and Safety Below Median Healthy Retiree Male Mortality Table, both set forward 1 year, with fully generational mortality improvements projected to each future decrement date with Scale MP-2018.</p> <p>For healthy participants during employment, PUB-2010 Headcount Weighted General Below Median Employee Mortality Table, separate rates for males and females, set back 1 year for males, with fully generational mortality improvements projected to each future decrement date with Scale MP-2018. For healthy participants post employment, PUB-2010 Headcount Weighted General Below Median Healthy Retiree Mortality Table, separate rates for males and females, set back 1 year for males, with fully generational mortality improvements projected to each future decrement date with Scale MP-2018.</p> <p>For disabled Police Officers, 80% PUB-2010 Headcount Weighted General Disabled Retiree Mortality Table / 20% PUB-2010 Headcount Weighted Safety Disabled Retiree Mortality Table, separate rates for males and females, without mortality improvements projected.</p> <p>For disabled General Employees, PUB-2010 Headcount Weighted General Disabled Retiree Mortality Table, separate rates for males and females, both set forward 3 years, without mortality improvements projected.</p>

Cost of Living Adjustment 1.5% / 2.0%

Other Information:

Benefit Changes

2019: Normal and early retirement eligibility was updated for Police Officers, General and Senior Management members, maximum benefit was updated to 80% for General members and the COLA was updated from 1.5% to 2.0% for retirements after January 14, 2020 for Police Officers and January 1, 2020 for General and Senior Management members; 2016: Created a senior management member class, changed retirement eligibility and vesting for Town Attorney along with increased benefit accrual rates, benefit cap and employee contributions for general employees and senior management. 2013: Police Officers - normal retirement eligibility updated to include completion of 15 years and 4 months of service if hired on a full time basis in March 2003; General Employees - may enter DROP upon attainment of normal retirement. 2012: Police Officers - normal retirement eligibility updated to the earliest of (1) age 52 with 20 years of Creditable Service, (2) age 62 with 5 years of Creditable Service or (3) completion of 25 years of Creditable Service. 2011: Town Manager and Town Attorney allowed to opt out of Plan.

GASB Statement Number 67 Information

III. Notes to Schedule of Contributions (cont'd)

Assumption Changes

2019: Mortality assumptions and retirement rates for General and Senior Management members updated. 2016: Mortality rates updated for healthy participants per State statute. 2015: Investment return updated from 7.5% to 7.25%; mortality, withdrawal rates, salary increase factors and retirement rates updated. 2012: Mortality assumption for healthy General Employees updated to RP 2000 Combined Mortality Table (RP 2000 Disabled Mortality Table for disabled lives), separate rates for males and females, 15 years generational projection from valuation date for actives - 7 years generational projection from valuation date for inactive with Scale AA; mortality assumption for healthy Police Officer participants updated to RP 2000 Combined Mortality Table with Blue Collar Adjustment, separate rates for males and females, 15 years generational projection from valuation date for actives - 7 years generational projection from valuation date for inactive with Scale AA.

IV. Discount Rate

A discount rate of 7.25% was used to measure the TPL. This discount rate was based on the expected rate of return on Plan investments of 7.25%. The projection of cash flows used to determine this discount rate assumed member contributions will be made at the current member contribution rate and employer contributions will be made at rates equal to the difference between actuarially determined current contribution rates and the member contribution rate. Based on these assumptions, the pension Plan's fiduciary net position was projected to be available to make all projected future expected benefit payments of current Plan members. Therefore, the long-term expected rate of return on Plan investments was applied to all periods of projected benefit payments to determine the TPL.

V. Sensitivity of the NPL to the Discount Rate Assumption

Measurement date: September 30, 2022

	1% Decrease	Current Discount Rate	1% Increase
Discount Rate	6.25%	7.25%	8.25%
NPL	\$ 14,602,748	\$ 9,214,103	\$ 4,813,433
