Agenda #: D1, D2 and D3

Agenda Date: July 08, 2014 & July 16, 2014

Subject: Approval and award of contract for roof repairs, Air Conditioner replacement with new chiller system and Mold Removal and Remediation for Town Hall.

Background: Town Hall had a major renovation in 2001 which only included minor roof repairs to the main center roof and painting with roof sealer, which was again done in 2012. The existing roof drains through the middle of Town Hall with a series of pipes which convey the rain water through the building down to ground level. The proposed roof will utilize the existing down spouts which will be replaced with new PVC pipe thus eliminating any leakage. Additionally, insulation will be added making Town Hall more energy efficient, in which there is no insulation currently.

In conjunction to the roof, the existing A/C units (5) are due for replacement over the next two years and in addition, these units have extensive decay from the elements we encounter here in South Florida. During rain events, water leaks thru the bottom of these units into the Commission Chambers, Code Compliance Office and training room leaving large amounts of water damaged ceiling tiles and puddled carpet.

As a result of the aforementioned items, in December 2013, Public Works contracted CIH Environmental Solutions to evaluate air quality and mold growth throughout Town Hall due to many years of roof leaks. The results came back in a report dated December 17, 2013 which outlined different areas throughout Town Hall which needed to be addressed through mold remediation, water damage repair and cleanup.

Analysis:
The roof and air conditioner system have been leaking for some time, performing minor repairs as needed. It has been determined that a built up roof system would be the most economical and efficient way to fix the roof problem. With a built up roof system you are able to move the rain water from a high point to a low point, draining the roof off thru engineered relief points at the lower end. This system will also insulate the roof adding to the economical and efficiency of the project. The engineered chiller system will afford the town the ability to cool and heat the building in an economical and efficient manner. Typical payback for a system of this type is 5 to 7 years. Once the roof and chiller system are complete we can address the parts of the building that were affected by the continuous water intrusion from the leaks over the years. Utilizing a piggy back bid through the Broward County School Board for mold remediation allows the Town to get this needed work done quickly and cost effectively.
In Town Hall it is recommended to remove baseboards, remove the wallboard of the east, north and west walls of the police chief’s office. Replace affected carpet and ceiling tiles in the Commission Chambers, training room and code officer’s offices. Clean and sanitize the walls in the police chief’s office before replacement.

All affected surfaces should be HEPA vacuumed. Additionally, indoor air scrubbing utilizing HEPA filters should be conducted in the areas described above for a period of at least 48 hours with a minimum of 20 air exchanges per hour.

A qualified contractor with experience in microbial and licensed by the State of Florida is recommended to conduct the material removal. It is also recommended by the NYCDOH guidelines, a health and safety professional with mold remediation experience should oversee the removal to document the conditions and assess areas not previously visible during the initial assessment.

**Budget Impact:** The A/C replacement project was not a budgeted item. Reserves will have to be used for this necessary project.

The roof project was not a budgeted item and reserves will have to be used for this necessary project. The budget impact is $65,000.00.

The budget impact for Town Hall remediation is $28,368.21 utilizing a Broward County School Board piggy back bid.

**Staff Impact:** Public Works staff will inspect and monitor with the Building Department.

**Recommendation:** Staff recommends the Town Commission approve and award a contract to Unlimited Roofing Services, Inc. in the amount of $65,000.00. It is recommended that the Town Commission authorize the Town Manager to execute the agreement with Unlimited Roofing Services, Inc. to commence the roofing project for the sum not to exceed $65,000 which includes a $7,300 contingency utilizing Account # 301-4400-539-6220.

Staff also recommends the Town Commission approve and award a contract for mold remediation and restoration for Town Hall to DECON Environmental in the amount not to exceed $28,368.21 utilizing a Broward County School Board piggy back bid. Funding for this remediation and replacement project will be financed utilizing Account # 001-5000-539-4602.

Bids will be opened on Monday, July 7 for the A/C replacement. Enclosed is the Resolution (minus the successful bidder and amount) for the acceptance for the A/C bid.
