**6. SUSTAINABLE BUILDING REQUIREMENTS (LEED)**

*Other communities are requiring their own new structures to meet sustainability criteria. Many also require this of new private construction. What should Surfside do? Review applicable criteria for fulfilling LEED certification at every level, understand those points that are realistic to achieve in Surfside, those that are more difficult, and develop a direction and level of requirements for incorporation where necessary.*

a) **New Construction LEED requirements – Sarah Sinatra Gould, Town Planner.**

**7. INFRASTRUCTURE PROTECTION**

*The long term view. Item 10 could be the first component focus as water level and soil issues in the H30A/B zone would be identified quickly.*

a) **UNDERGROUNDING UTILITIES FEASIBILITY**

*Some see the undergrounding as disruptive and unnecessary. Others see it as an aesthetic and reliability upgrade long overdue. Both cite the infeasibility / feasibility as favoring their position. Address the challenges, risks and merits as the matter of placing infrastructure close to and in the path of a rising water table is central to the discussion.*
