

Message from the Town Manager

Across the globe, Earth Day is celebrated on April 22 with various events to demonstrate support for the environment. In Surfside, we observe this important movement 365 days of the year. The month of April is certainly no exception. Allow the Parks and Recreation Department to show you how easy it is to be green at the Earth Day Resource Fair on Sunday, April 14. During this annual event, residents can learn ways to be friendlier to the planet, participate in arts and crafts, giveaways, a showerhead and light bulb exchange conducted by Miami-Dade County, plus enjoy music and light refreshments.

Conservation is key to protecting the earth's natural resources and the Town of Surfside will once again take part in the Wyland National Mayor's Challenge for Water Conservation from April 1-30. Residents are encouraged to visit the www.mywaterpledge.com and make a series of online pledges to reduce water consumption. The community with the most resident participation will win prizes (see page 3).

Trees are another precious resource. Surfside is designated a Tree City USA community for the third consecutive year by the Arbor Day Foundation. As part of our continued commitment to expand the urban tree canopy, trees will be dropped off on Arbor Day, April 26 to Surfside residents who registered for the Town's tree giveaway by the March 22 deadline.

Are you doing your part to reduce your carbon footprint? Let us work together to further green our community.

- Guillermo Olmedillo, Town Manager

CODE COMPLIANCE CORNER

Sea Turtles and Lighting

The Town of Surfside has a Sea Turtle Lighting Ordinance that requires all eastside Collins Avenue properties to comply with protective lighting measures. Enforcement runs from May 1st- October 31st. Therefore you should draw shades at night and move bright lights away from windows. The below information was provided by the Sea Turtle Conservancy, Gainesville, Florida.

Lights that shine onto a nesting beach can draw turtle hatchlings away from the ocean and off the beach where they have a slim chance of survival. In addition, beach lights can also scare away females crawling ashore to nest. Nesting sea turtles once had no trouble finding a quiet, dark beach on which to nest. Now they must compete with tourists, businesses and coastal residents for sandy beaches.

Lights from beachfront developments can be problematic for nesting females and hatchlings. Beachfront lighting can also cause sea turtle hatchlings to become disoriented and wander away from the ocean towards the brightest lights. When this happens, the hatchlings often die from dehydration, exhaustion, terrestrial predators and passing cars.

Beachfront lighting can be properly managed to benefit humans and sea turtles. In general, a good sea turtle friendly lighting fixture directs light down to the ground where it is needed for safety, shields the light source from being visible from the beach, and is outfitted with an amber or red LED light bulb.

When choosing lighting for your coastal property, please remember these three simple rules:

KEEP IT LOW - Use low mounting height and low bulb wattage. Flood, spot and pole lighting are highly discouraged.

KEEP IT SHIELDED - Use full cut-off fixtures that direct the light down to the ground. Shield fixtures so you cannot see the bulb, lamp or glowing lens.

KEEP IT LONG - Sea turtles are less disturbed by the long wavelengths of light (570 nanometers or longer), such as lights that are yellow, amber or red in color.

For additional information regarding sea turtles and lighting, contact the Surfside Code Compliance Division at (305) 861-4863, extension 230, or the Sea Turtle Conservancy at (352) 373-6441.

PUBLIC WORKS

PUBLIC WORKS BUILD PLATFORMS FOR STUDENT MOSAIC ARTWORK

Residents may have spotted the blue markers at the street ends on the beach hard pack. Those are future sites of beautiful mosaic art pieces created by talented Ruth K. Broad Bay Harbor K-8 students. The Surfside Public Works Department has been installing the concrete platforms and will add the vibrant designs to the markers. The school's art teacher, Maggie Vidal-Santos, praised the hard work and creativity of her students as the colorful artworks came alive over the last year. She explained that a group of seven middle schoolers have stayed after-school once a week to work on the mosaics. They decided the mosaics should be beach-themed featuring sea turtles, fish, sunsets, umbrellas and waterfront scenes relevant to the Town of Surfside. The design and creation process took about a year. The project will further beautify Surfside's street ends and will also mark the street number of each site. The installation of the mosaics will start soon.

PUBLIC WORKS KEEPS THE STORMWATER SYSTEM HEALTHY

As part of the maintenance of the Town's stormwater infrastructure, Public Works performs routine structure inspections such as confined space entry of well box chambers. The purpose is to inspect for structural issues and check electronic components such as wet well levels and pressure sensors. Public Works also inspects the structures for sediment build up and non-organic debris like plastic bottles. Well boxes are designed to have a series of concrete baffles and trash screens to separate sediment and floating trash from stormwater runoff collected through catch basins. This system acts as a filtering mechanism to reduce pollution in the stormwater that drains into Biscayne Bay.

Tips to Selling Your Home

Tip 2: When getting your home ready to sell, sprucing up your home's landscaping is an inexpensive way to add curb appeal. Remember when interviewing landscapers, do not ask them what the new landscaping will cost. You always give the landscaper your budget. A good landscaper will do a wonderful job adjusting to your budget.
